Subject: Re: ARPA Info for Building & Energy Workgroup Meeting

[CAUTION - EXTERNAL EMAIL - Verify Sender]

Reluctantly, not wanting to extend what has become a ridiculous conversation about proper public policy protocols, I share that like Larry, I have felt bullied by David Camp. His use of the term "greenwashing" to denigrate and dissuade discussion (making it personal at times) about exciting

advances concerning Green H2, RNG, and anything that is counter to his visceral contempt for natural gas is offensive and not in step with [Washington State policy](#).

We all have witnessed David delivering misinformation including, but not limited to (paraphrased, because we have not official recording to review):

- Camp states, "getting gas out of buildings is the essence of what we are doing." This is in direct opposition to the City Council, The SAP, and Council President Beggs on several public occasions.
- Camp states, "46% of WA GHG emissions come from buildings." Only for him to change his number in an OP ED in the Spokesman days later to 26%.
- And, only yesterday, David claimed some sort of "after the public meeting" amendment to the public SBCC nearly 6-hour meeting that took place last Friday.

In all fairness, if I owe David an apology for my previous email to this group that he sells solar panels and heat pumps, and he in fact is no longer employed by nor serves as an advertising agent for [Northwest Renewables](#); I publicly apologize. It is clear that at some point David did serve as a marketing and sales agent for this business that sells solar panels and heat pumps.

In mentioning this, I was only speaking to a possible conflict of interest aspect of the application to SAS that we all signed. I never suggested that any of us are unfit to serve, just that my interpretation is that we are obligated to be open about and disclose any actual or perceived conflicts. Pretty standard stuff.

For the record, and in response to a recent email from David about me, I do not "work for a gas company union." But, as none of us are attempting to play investigator, I forgive David's loose description of my body of work. Again, it appears I may have been equally lax in regard to David's current employment (or lack thereof).

In serving on this reconstituted SAS, my most alarming experience was an email by David Camp in which he took it upon himself to categorize each of us as "vested" and "unvested." Then "paid" and "unpaid." I have made an attempt to diagram my understanding of David's views of us (see attached). It is clear that David is incapable of reconciliation that a sweet spot can exist that integrates multiple motivations for service, and that we do not fit neatly into his binary quadrants.

I believe that Camp 3, 4, and 5 (see attached) in fact do exist. And, I recognize you all in many integrated and mutually beneficial "Camps." Including you, David.

Thanks all.

Subject: Fw: ARPA Info for Building & Energy Workgroup Meeting

To be honest here I feel Dave Camp is trying to bully me. My understanding of bullying as the dictionary say's is one who blustering browbeating a person. What I have said that when Mr. Camp gives incorrect information, I have called him on it. I will not let people give miss information any more to build their case. I will stand up for the truth. When these untruths are let go, you see in Russia what happens, people start to believe what is said if it said enough. Even when it is not true people start to believe the untruth. Then it becomes harder to bring the truth forward. As for global warming being totally cause by fossil fuel this only theory. As for Malden the more wires you put up in the air the more this is going to happen. Plus, lack of large aerial response for such fires, by lack of Governor to act on funding for such aerial response for the fires. If we just keep are head in the ground or don't change the way, we fight fires more are going to happen. Some of these fires could be cause by the natural gas venting to the surface. This happens naturally not from pipes in the ground. But we must start to change the way we are doing things in fighting these fires or it will just keep happening. See the article that I wrote in the Spokane paper full page add if you need copy, I can supply it if you want. Right now, without Natural gas people would freeze to death by the 1,000,000s. You should be thankful for the hard-working people getting the Natural gas to your homes and business. As Dave said I do sell gas heat equipment, but we also sell heat pumps, but most people don't like the drafty ness of heat pump and the cost to keep them running in good shape. We sell equipment that I can look you in the eye and say this is good for you and you will be happy with your fuel bills. I am not going to tell any untruths. I have been business over 30 years and I think we have done well for the consumers who we serve, or I would not be in business. I think address most what Mr Dave Camp brought up. Thanks for taking your time out of your day to hear my comments on what I have to deal with on Dave Camp.

Subject: Re: ARPA Info for Building & Energy Workgroup Meeting

Larry,

No one is allowed to join this advisory group simply to obstruct it or to bully its members. If you and Jim insist that those with economic conflicts leave the group, lead the way! You sell fossil-fueled furnaces and Jim works for a gas company union.

We will no longer discuss videoing volunteers against their will, nor will we agonize over the spelling of "subcommittee".

Contrary to your claims, I haven't worked in solar for two years, and I have never been in the heat pump business. On the other hand, if you're accusing me of being a concerned citizen, consider me guilty as charged.

Science tells us that the mess we've made of our climate is killing people and destroying property, here and now. I invite you to consult the people of nearby Malden or Lytton, whose towns just burned to the ground in

the hottest summer our region has ever seen. Or ask the hundreds of other Washington and BC families who lost loved ones to the heat. This is a life-and-death matter.

We all stepped forward as citizen volunteers, lending our time and expertise to help the city meet its emission targets, and to find ways to save lives and property in our drying, fiery future.

You have a weatherization proposal due in three weeks. This is a workgroup, now please get to work.

~ David

Subject: RE: ARPA Info for Building & Energy Workgroup Meeting

Here is my take in order to be on this committee . I had to sign the Application for Sustainability Action Subcommittee. Also, the word Subcommittee is miss spelled in the title of the Document what's up with that. No spell checker in their system. I had to sign this document, in that document that I subject to the Washington State Public Records Act. To me this means that I will be in meetings that are in public record or recorded. It also say's I will follow a code of city's Code of Ethics set fourth in Chapter 1.04A of Spokane Municipal Code. Which I am sure that you are to tell the truth in such a document. I also know that Dave Camp said today he has no interest in any of what we all hear talking about. I personally don't think that this is true at all. I think Dave Camp has many ties to the solar industries. Which I don't have any problems with that. I just think that these Solar Panels should be made in the USA or country that doesn't support Russia and doesn't in slave their workers, sterilize there women so they don't miss a day of work to build these solar panel, shift their products to another county to avoid paying tariffs and use coal power plants to make these panels where you can even see the sky because of all the pollution that is caused in building these solar panel. They need to have a plan and money in place to take care of the environmental problem when they need to be decommissioned. Also training for the fire departments so when there is a building fire, how are the fireman are going to turn off these panels, so they don't get shocked. I will be in contact with city

attorney about all these quotes about what can be done and should be done in the morning. I don't understand why if you are telling the truth why you would not want the Spokane citizens to be able to see and hear with their own eyes and ears on what is going on in these meetings. So, they can see how these committee look to spend their city money. What is the big secret out there, that we don't want our citizen to know, is there something I been missing?

David,

As a current advertising agent (Northwest Renewables client, to my knowledge per your Camp Creative firm), and a former salesman of heat pumps and solar panels (Northwest Renewables per your Facebook), who has not disclosed at least your perceived conflict of interest as required per your application to SAS, and as you have not been duly-elected into any manner of leadership by the SAS B&E (you volunteered), nor have you been granted any leadership authorities by our body, nor are you to my knowledge an attorney-at-law; you have no capacity to advise on matters of privacy rights.

If you wish to make a legal argument, please cite statute, etc.

Jim

Hi Jim,

No need to spend the city's money, nor your valuable time. As we discussed today, a number of the workgroup's volunteers would prefer not to be video-recorded, as is their right. Again, these are not public meetings; we are all volunteers, and the law is clear that distributing videos of private citizens who'd rather not be videoed is a violation of privacy.

Best,

David Camp

Hello B&E Group,

Thanks for our conversation today. Since objections to a more robust and inclusive participation of the process have included cost ... And, since it was revealed in our conversation that funds in excess of \$80 million are available, I propose that we apply as a group for ARPA funding in the amount of one hundred, forty nine dollars and ninety cents (149.90) to expand our Zoom meetings and record-keeping abilities.

This funding will allow us to:

- Work together longer than one hour
- Record our deliberations

I will prepare the application.
